TECHNICAL PROJECTS

My Clinic — Frontend | Backend | Demo

An application that will let patients and doctors stay connected and improve communication.

- Utilized Dev Extreme Scheduler library to display appointments
- Implemented JWT and BCrypt to create and store encrypted information in client and server respectively
- Designed using the Bootstrap library

Amazon — Frontend | Backend | Demo

An e-commerce website where users can purchase items based on different categories and leave reviews.

- Enacted a cart functionality using Local Storage
- Built using the Ruby on Rails backend with customized data

Clash of Heroes — Source | Demo

A game where users can create their own super team and battle against a random team of super characters.

- Demonstrated full CRUD functionality using Active Record model
- Constructed using multiple routes to increase accessibility
